### **SUMMARY**

I am a business analyst with a flair for solving complex business problems adhering to fundamentals of software engineering and loads of creativity. I excel in both technical (VoIP, Linux, Networking, Mini CRM, and programming) and consultation side of the business with experience in interacting with clients and making presentations to senior executives.

#### **Experienced in:**

- Requirements gathering, analysis, solution design.
- Creating work order estimates, Proof of Concept demos, bench marking and solution comparisons.
- Leading and being part of cross functional teams.
- Presales strategic planning.
- Work and coordinate with all parties concerned.

Fluency in both English and Thai. I am a personable team player and a firm believer in delivering high quality work efficiently. My colleagues describe me as approachable, enthusiastic, resourceful and helpful. I enjoy working in multicultural work environments as I am a believer in continuous learning.
