EXECUTIVE SUMMARY

I would like to be a System Developer at a software house.

Your programs will be safe with my secure coding.

I am a fast learner. So I can develop programs with many
languages and many frameworks depending on your
requirement.

If you are finding a person who love a challenge job, please
contact me.

It is good if your company has flexible time.

TECHNICAL SKILLS

Present technical skills usage

Languages: PERL, PHP, SQL, HTML, CSS, and JavaScript.

JavaScript frameworks: Bootstrap, jQuery, Prototype, and ExtJS.

PHP frameworks: Zend.

Database software: MySQL.

Additional information: Develop software under MVC concept and do not use inline JavaScript.

Experiential technical skills usage

Languages: Java, VB.NET, C#.NET, ASP.NET, and PL/SQL.

Database software: Oracle and SQL Server.

LANGUAGES

Spoken: English

Written: English

WORK EXPERIENCE

WebOn Thailand Co., Ltd.

May 2013 - Present

Position: System Developer

This company has its own product information management software.

I am a backend programmer but I have a lot of tasks to do frontend part.

So I have developed my frontend programming skills too.

Backend part: PERL language is a main language. Use PHP language with Zend framework in some software. Each language is developed under MVC concept.

Frontend part: Use ExtJS, jQuery, and Prototype frameworks for JavaScript language and use Bootstrap framework for CSS. Now we use CSS3 and HTML5 for a new project.

We use MySQL software to manage databases.

WORK EXPERIENCE

Siam Secure Consulting Co., Ltd.

Nov 2010 - May 2013

Position: Software Developer

This company is a network security consultant.

I was a software developer. I used Java language to develop log analyzer software and used Sphinx engine to do full-text indexing and searching for the software. Moreover I used PHP language to develop a captive portal. Used MySQL software to manage databases.

I had a chance to teach secure coding for customers 2 times and also had a chance to do penetration testing about web application 1 time.

Softscape Asia Co., Ltd.

May 2010 - Nov 2010

Position: Staff Developer

This company has its own human resource software.

I used a language which was developed by this company.

I moved from here because it was taken over and moved to India.

WORK EXPERIENCE

Supreme Products Co., Ltd.

Jun 2009 - Apr 2010

Position: Programmer

This company is a distributor and a service provider of medical device.

I developed ERP and MRP software by using VB.NET, C#.NET, ASP.NET, PHP, HTML, JavaScript, PL/SQL, and SQL languages. Used Oracle and SQL server software to manage databases.
