

Natthawat Lekrath

Software Developer (PHP)

Date of birth: May 5, 1981

Nationality : Thai

Address : 29/71 Soi Rewadi 35, Tambon Talat Kwan, Amphoe Mueang Nonthaburi, Nonthaburi 11000

MartialStatus : Single

Phone : 090-992-9885 **Email :** natthawat.lek@gmail.com

Summary

I'm a software developer with more than 8 years experience in front-end development. My strongest skills are in PHP, Drupal, HTML5/CSS3, .Net(C#) and have lengthy experience in Cloud Computing services like Amazon S3 and EC2. My experiences include developing cross-browser and cross-platform compatible solutions and have worked closely with many clients to understand their requirements.

Technical Proficiencies

- PHP, C++, C, Java, HTML5, CSS3, Drupal, .Net(C#)
- JavaScript, JQuery, Json, AJAX
- Photoshop, Dreamweaver, Eclipse
- Amazon S3, AWS EC2, Google Analytics, Google map API
- SQL, Mysql, Oracle

Work Experience

Berli Jucker Public Co.,Ltd	Sep. 2015 - Present
Senior Software Developer (PHP)	
Lanna Softworks Co.,Ltd	Sep. 2012 – Aug. 2015
Software Developer (PHP)	
ICE Solution Co.,Ltd	Aug. 2010 – Aug. 2012
Programmer	
Toyota Nonthaburi Co.,Ltd	Jun. 2007 – Jun. 2010
Programmer Analyst	
3BD System Co.,Ltd	Feb. 2006 – Oct. 2006
Programmer	
Suranaree Software Engineering Co.,Ltd	May. 2004 – Jan. 2006
Software Developer	

Education

Suranaree University of Technology	2000 - 2003
Bachelor's Degree of Engineering, Computer Engineering	
Uttaradit vitaya school	1996 - 2002
High school education	
Bandendan school	1989 - 1995
Elementary education	

Language skill

English	Poor	Fair	Good	Excellent

Purchase Order System – Web application

In this project has a one developer that me. I worked for 4 months on this project. This project was about the purchase car parts for the customer, this project will be help the company's customers to access this web page to purchase the car parts what they want. I was responsible for get and analyze requirement from users and design the wireframe and created the web page from wireframe to the HTML/CSS. The next step, I had custom the function using PHP. What I was interesting about the project was the knowledge the business process with the purchase system.

My role and responsibilities

- Get requirement, Analyze requirement and design database.
- Modify existing parts of application, testing, debugging.
- Implement and maintenance on client requirement

Technologies Utilized

PHP, JavaScript, Mysql

Assets System – Web application

In this project has a one developer that me. I worked for 4 months on this project. This project was about the system for tracking the company's asset such as the computers, printers, cars etc. This project will support the employee in general administrator department to know about the location of asset and who was responsible on this assets. I was responsible for get and analyze requirement from users and design the wireframe and created the web page from wireframe to the HTML/CSS. The next step, I had custom the function using PHP. What I was challenging about the project was how to design the friendly UI with the user.

My role and responsibilities

- Get requirement, Analyze requirement and design database.
- Modify existing parts of application, testing, debugging.
- Implement and maintenance on client requirement

Technologies Utilized

PHP, JavaScript, Mysql

IP Management System – Web application

In this project has a one developer that me. I worked for 3 months on this project. This project was about the system to help IT supporters to manage the new IP address for the new user in the company and they will be record the program utilities that they had installed into the computer for the user. It will be help fully when the company need to be repair by install new operating system, IT supporters will search for the computer data in this system to setup the IP address and install the program utilities. I was responsible for get and analyze requirement from users and design the wireframe and created the web page from wireframe to the HTML/CSS. The next step, I had custom the function using PHP. What I was interesting about the project was the knowledge about the IP generate and IP classes.

My role and responsibilities

- Get requirement, Analyze requirement and design database.
- Modify existing parts of application, testing, debugging.
- Implement and maintenance on client requirement

Technologies Utilized

PHP, JavaScript, Mysql
