### ABOUT ME

A hardworking and highly proficient IT professional with 6 years' experience and genuine passion for mobile application development. An in-depth understanding of the main mobile platforms helps me to recognize the subtle differences between each. Having helped develop a series of commercially successful apps on iOS, Android Mobile, I am seeking a new opportunity allowing me to further expand on these skills.

Applications developers work in a range of business sectors, including finance and the public sector. They often work as part of a team with other IT professionals, such as software engineers and systems analysts, and write programs according to their specifications.
