<p>Major: RECONCILLIATION DEVELOPER/ SOFTWARE DEVELOPMENT/ JAVA PROGRAMING/ DATA MINING</p> <p>Sex: Men</p> <p>Age: 30</p> <p>PoB/DoB: Jakarta, july 21 1985</p> <p>Religion: Kristen</p> <p>Martial: Merid</p> <p>Children: 2</p> <p>Citizen: Indonesia</p> <p>EDUCATION BACKGROUND</p> <p>2002-2011: Bachelor in Gunadarma University Major: Information Technology(IPK 3.00) collage thesis: "APLIKASI MONITORING DATA TRANSAKSI ATM BERBASIS WEB DENGAN MENGGUNAKAN PHP CAKE DAN DATABASE MICROSOFT SQL SERVER 2000"(Application monitoring ATM transcation using PHP cake and Mocrosoft SQL Server)</p> <p>1999-2002: SMUN 86</p> <p>1996-1999: SMP 177</p> <p>1990-1996: SDN 08 petang</p> <p>WORKING EXPERIENCE</p> <p>December 2015 - now</p>	<p>Team Leader Java Telco in Firstwap. Task: Leading Java team in Firstwap to provide tools for telecommunication. And provide API for get OSS data from Operator telecommunication for getting location. Using Spring and Maven as base for building application API get OSS data. Using socket and FTP process for get data. Decoding Tap Binary file Using 3gpp standard. For ericsson,huawei and alcatell. Make calculation for base on that data this application running in Tomcat server. Making Aplication</p>

	that can Using Diameter Protocol (4G).
September 2015 – now	Senior Software developer(Java) in Firstwap. Task: Fix and tuning software Firstwap for tracking. Fixing running time problem in User login. Making software tracking vehicle for Personal collector use by FIF (Astra group). Using Gradel as base for tracking Application. That Using Hibernate as Database manipulation. Spring as Web container. That will be running In Jboss server. For tracking Vehicle in FIF using Maven and ZK framework for container combine with spring. This application running in Glass fish server using Oracel Database as Storage data.
April 2014 - September 2015	Senior Software Developer(Java) in Mobafone. Task: maintain and tuning SMS content provider for sending content and read response from operator in indonesia(XL, TELKOMSEL). Making new model of SMS Content Subscription configuration so can be remodel by User admin. Making Android TV streaming base on SMS authorization. Data Mining daily report transaction. Make SMS queue using Mongo DB and Redis temporary storage. Data will be process in java logic that will be sending in HTTP or SMPP. Using NodeJS as asynchronus process for make connection from adverting vendor to Operator and Mobafone. For SMS subscription some configuration can't maintain by user administrator. In order to do that need to change some of logic in class factory of sending time. Making Streaming TV base android apps that will be charging for premium content Via SMS service. This android application Using java programing language as base. For Data Mining java will be calculate all transaction each day and storage in database as compact data.
Mei 2012- April 2014	Java Programer in PT. MNC SKY VISION(indovision). Task : making Streaming authorization for activation costumer using NDS standard streaming to activate television service. Making SMS gateway for technician so they can activated pay TV service via SMS. Make scan finger print for costumer activation service using SDK UareU Digita persona; Using standard NDS Streaming for

	<p>activation Satellite pay TV VC. This application just encode human readable format to plain stream of Binary with MD5key. The SMS gateway is extend developing of how to access this service. Because field technician need fast request to activate VC that they handle MNC sky vision making policy that technician can activate via SMS. Finger print project Is project that make authorization of VC only can be person that have authorization, so finger print that will make sure only that person can do that. Because Sharing User and password for authorization.</p>
Mei 2011-Mei2012	<p>Java Junior Programmer in PT. Sarana Yukti Bandana (SYB)</p> <p>Task: maintain and tuning online payment point. Maintain and tuning Reconciliation of Electricity Payment prepaid and postpaid. Making improvement monthly statistic of income. Using Standard java version to make desktop application. That Menu of that Application will be authorize by API that running in Glass fish server. Reconciliation that will be compare data from Bank and Biller that will be adjust by looking record of each transaction in server. This Application Using Standard java and Oracel as data base. For improvement monthly statistic this application Using Play framework for web container and mysql as the database container . Tuning how to query and give 1 year statistic.</p>
January 2010- April 2010	<p>Senior Reconcile Programmer in PT. andalan arjuna arsana</p> <p>task : making Renconcile program for ATM that will be check are Withdrawal activity. Payment activity,transfer activity of each ATM in That BANK.</p> <p>For BANK BTN.</p>
January 2009-Desember 2009	<p>Senior Reconcile Programmer in PT. Miltra Mulia Sejahtera</p> <p>task : making Renconcile program for ATM that will be check are Withdrawal activity. Payment activity,transfer activity of each ATM in That BANK.</p>

<p>August2007-Desember 2008</p> <p>August 2004-August 2007</p> <p>SKILL</p> <p>Software</p> <p>Hobby</p> <p>karakteristik</p>	<p>For BANK MANDIRI</p> <p>Senior Reconcile Programmer in PT. Miltra Mulia Sejahtera</p> <p>task : making Renconcile program for ATM that will be check are Withdrawal activity of each ATM in That BANK. For BANK MANDIRI</p> <p>Laboratory of Information technology mentor on Gunadarma University</p> <p>Job desk : teach Basic flow of programing Like pascal,visual basic,basic , C,C++,COBOL, PHP; software Developing case like: UML</p> <p>Hibernate, ZK framework, NodeJS, Ms. Office, PHP programming , Microsoft SQL server builder,MySQL, javascrip, .net programing, Java j2se, Play framework, maven;</p> <p>Music,game Online</p> <p>team work, high adapt with new environment, working under high presure, willing working Outside the town.</p>
