During my 20 years of experience, I developed many IT digital skills in mainframe and Microsoft solutions (Windows, .NET, SharePoint, Yammer, Office 365) in different steps (implementation, support and deployment) and at different levels (architect, expert, trainer, leader, manager). Beyond those IT skills, I have also developed real skills of decision making, coaching, communication and mediation. Digital is the blood of any organization and it is important to give companies the best knowledge in digital transformation.

Based on my skills I developed a really strong hard skills and soft skills in digital transformation and more especially in change management.

With these strengths, I want to be a **Senior digital transformation manager** to be the interface between business team (marketing, HR, ...) and IT teams to build the right digital solution for the right business need.
