PORTFOLIO

No more paper cards filling up your wallet!

Get your cards stamped directly on your phone!

1 STAMP V.2

- Stamp is a loyalty application that allows users to collect and redeem stamps on their mobile phone just by having staff used the 2-factor authentication hardware devices, "Stamper device", to stamp on users' mobile phone directly.

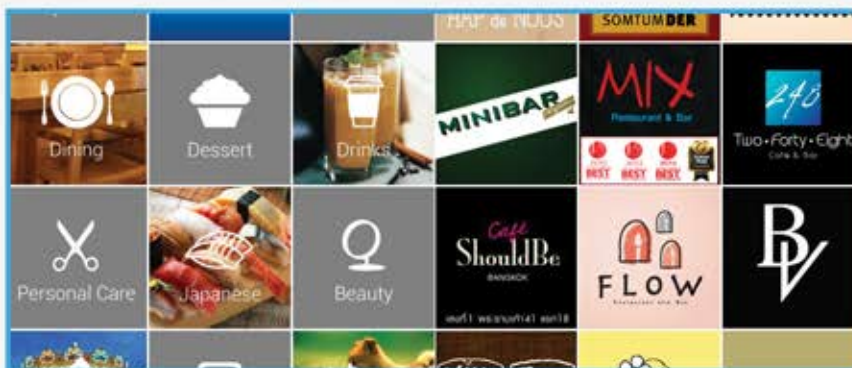

+ SQLITE

- In-app database designed to be fast and easy to query for fast response.

+ CUSTOM UI

- Create custom view to used in conjunction with "Stamper device".

+ MODEL-VIEW-CONTROLLER

- With MVC model, data can be so dynamic. Not a single line of code has to be changed.
