PROFILE

I have been involved in Design field professionally for over 15 years. I'm creative, pixel-perfect specialist with ability and I'm using my artistic talent, my other skills and previous experience at the max during my working process. These circumstances are reason for providing an amazing result with any kind of tasks. Usually I'm serving as a UX / UI / Visual Designer and I'm responsible for all processes of digital product's creation, starting from idea and following through wireframing and prototype to the launch.

As a team member I had been worked in collaboration with UI engineers and lead the other designers. I was worked on graphics for the different startups such us: trading platforms (forex, forex currency exchange), b2b / b2c geo location system with complex investment's statistics for country regions, wide types of web apps, mobile apps and games. My responsibilities included creating user interfaces, wireframes, web apps / mobile apps' prototypes, illustrations, game graphic and corporate identity.
