EXECUTIVE SUMMARY

My name is Wachirawut Phungirnngok, I'm interest and love web developments, design, ux/ui design and coding. But I choose coding in main career path and now interest in MEAN stack technology.

Over 4 years web development work experience, I developed myself better in many ways.
For example :

- Work with develop team and learning about division of duties and responsibilities.
- Learning AngularJS, ExpressJS, NodeJS from Udemy course.
- Learning a new web, database technology and UX/UI to design systems and user interface to user friendly.
- Meeting with customers to analyse the problems and requirement of the customer.
- Consulting and troubleshooting customer's problem.

My strengths is always develop myself to learning new technology, responsible in the work assignment and has the ability to endure pressure.
