Job title	Infrastructure DeVops
Location	Bangkok, Thailand

Company Description

We are currently assisting an international IT company.

Job Purpose

The primary function of this role is responsible for ensuring that the teams have an understanding of operational requirements, and takes a shared designing and implementing infrastructure responsibility for delivering and running software services. This involves hands-on involvement in building deployment and testing pipelines, optimizing our build system, creating tools to facilitate testing and automated provisioning of internal infrastructure.

Duties and Responsibilities

- Supporting application deployments; building, upgrading and patching.
- Develop automation and processes to enable teams to deploy, manage, configure, scale and monitor applications.
- Using monitoring tools to find and solve problems to ensure we exceed our SLA's.
- Actively participate in high level team activities such as suggesting architecture improvements, recommending process improvements and conducting tool evaluations.
- Staying up-to-date about the latest mobile, infrastructure and digital technologies.

Candidate Profile

- Experience with DevOps practices like automated provisioning/deployments, infrastructure as code using tools ie. Docker, Chef, Puppet, Ansible, Kubernetes.
- Experience with continuous integration tools ie Jenkins.
- Experience working with VMWare or OpenStack.
- Experience administering application servers, web servers, and databases ie. Apache, Tomcat, Microsoft IIS, etc.
- Some experience with unit testing and automated testing tools.
- Scripting and programming languages ie. Python, Ruby, Perl, PowerShell.
- Proficiency in building Linux and Windows systems (RHEL/CentOS)
- Collaborative and team focus.
- Fluent in both written & spoken English.
- Bachelor's degree in Computer Engineering, Computer Science, IT or related fields Technical/Architectural certification(s) across network, storage, server, virtualization and cloud technologies preferred.
- Minimum 3 years' experience in a Devops activities with extensive knowledge of

designing and implementing Devops processes.
