Job title	Quality Assurance (QA)
Location	Bangkok, Thailand

Job Purpose

The primary function of this role is responsible for developing and delivering innovative quality assurance solutions. QA will expect to design, develop, test, and deploy advanced quality assurance solutions using Agile.

Key Challenges

- We offer a very challenging job in a rapid prototyping environment.
- You will have the opportunity to influence the interaction and lifestyles of millions of customers through creating great products.
- We offer a lot of personal development and growth opportunities.
- This field is just in its infancy and the growth potential of the team is imminent and immense.
- We will invest in an attractive and dynamic lab environment workplace: a cross-road of innovation, design, and technology.
- Your compensation package will be highly competitive.

Candidate Profile

- At least 3+ year professional experience in QA / Testing.
- Automate test programming (Selenium, Appium, etc.).
- Strong in exploratory testing.
- Scripting skill (JavaScript, shell, python, etc.)
- Focus on smallest detail that are meaningful to our customer.
- Comfortable with working on any device and reproduce use case scenarios.
- Agile experience a big plus.
